PLAN Nr.: SA-1A

LEGENDE:
Grenze des Geltungsbereiches

This technical drawing is a detailed engineering plan for the Aarburgerstrasse in Olten, Switzerland, specifically the section where it meets Sälstrasse. The plan is oriented with North at the top, indicated by a compass rose. The main road, Aarburgerstrasse, runs horizontally across the middle of the drawing, highlighted in orange. It features a central 'Fahrbahn' (driving lane) and 'Radschienen' (cycling tracks) on both sides. A yellow-shaded area indicates a specific project zone or construction area. The plan shows numerous buildings and plots along both sides of the road, each labeled with a number and the owner's name. For example, on the left side, there are buildings numbered 2604, 3239, 3255, 3313, 3238, 2132, 703, 4478, 3602, 1439, 1173, 1403, and 1404. On the right side, buildings are numbered 4468, 1556, 701, 604, 1094, 1095, 602, 4220, 2753, 2756, 1762, and 4221. The plan also shows various infrastructure elements like 'Ein- und Ausfahrt' (entrance and exit) points, 'Trottoir' (sidewalk), and 'Radschienen' (cycling tracks). A scale bar at the bottom left indicates a scale of 1:200. The drawing is a technical representation of the road layout and surrounding properties, used for planning and construction purposes.
